**44TH ANNUAL
BULL
PRODUCTION
SALE**

WEDNESDAY, APRIL 11, 2018

**50 YEARLING BULLS
30 FALL BULLS**

LUNCH 12:00 NOON

SALE 1:00 PM

*Located 1 mile South of Wyola
on Hwy 451 or 35 miles North of Sheridan, WY*

Dear Friends, Fellow Cattlemen and Cattlewomen,

Welcome to our 44th Annual Bull Production Sale! We would like to thank you once again for your commitment to our operation and trust in our genetics.

As the years keep clicking away, it should come to all our minds “just how many years do I have to get my herd where I want it to be”. We all have a finite amount of time to make a difference. We have to figure out our goals to produce cattle that will generate more money than the commodity cattle...”The Profit Makers”! So where do we begin? Well, there is no production trait more important to a commercial cattleman than pregnancy. Herds having a greater percentage of calves born within the first 21 days in the calving season are generally the most profitable herds. We need those “foundation cattle”. The ones that lead the herd, always putting a live calf on the ground for you. This is where we come in. Let us help you put those foundation cows into your herd with our quality genetics. Let us do all the science behind the data for you. We have put together our bulls with you in mind. The expense of a bull can be the greatest investment in the future of your herd and here at Pass Creek Angus Ranch, only the most fertile bulls make the grade and we back it up with a guaranty of breeding soundness. Let’s lead the way to profitability together.

The bulls are ready for your viewing so if you would like to stop by to preview them, please do. We are always available to answer any questions and proudly give you a tour of this year’s offering.

Thank you for your interest and hope to see you at the sale!

Lodging

Lodging is available in Hardin, Montana, Ranchester and Sheridan, Wyoming. Call us if you need additional information.

Terms and Conditions

Cattle will sell under the Standard Terms and Conditions as recommended by the American Angus Association. Terms of sale are cash.

Supplemental Information

Announcements from the auction block takes precedence over catalog information.

Liability

All persons who attend the sale do so at their own risk. Pass Creek Angus Ranch assumes no liability, legal or otherwise, for any accidents which may occur.

Breeding Soundness

All bulls passed a breeding soundness examination and semen evaluations. Dr. Matt Cherni, DVM is in charge of our herd health. Dr. Cherni will be here sale day to answer any questions, or you are welcome to contact him at **307-655-9395**.

Guarantee

All bulls selling for \$2,500 or more will be covered against breeding injury for 50% of value by Pass Creek Angus if they are injured during the first breeding season. Breeding season is defined as a 90 day period following the first turn out of the bull. In case of a loss:

1. Notify Pass Creek Angus as soon as possible.
2. Verify the injury with a veterinarian; we may seek a second opinion.
3. Credit minus salvage value will be issued or a replacement bull can be supplied, if available.
4. A copy of the salvage value will be required.
5. Credit is good at any Pass Creek Angus sale and does not expire.
6. This guarantee does not cover death.
7. All claims must be made before September 1, 2018.

Discount

A \$40 rebate per bull will be given if buyer picks up bull on sale day only. Arrangements available to feed bulls until pickup can be made.

Delivery

Free delivery of bulls up to 250 miles, balance at cost.

Absentee Bidding

If for any reason you are unable to attend the sale, you may contact us with your requirements in a bull and we will send you a list of bulls that fit your needs and then contact one of our Sale Representatives with your bid(s) and they will do their best to get them bought for you. You may also pre-register for a buyer number by calling us and then bid from the comfort of your home by phone with one of our Sale Representatives. We have a "Sight Unseen" Guarantee on all bulls purchased in this manner. If you don't like 'em, you don't own 'em.

All bulls are semen tested and ultra sounded.

Whole herd tested PI BVD free!!

The bulls are at the ranch so please feel free to stop by anytime and preview. If you have any questions or just want to "shoot the bull", call us here at the ranch.

**For Sale - Private Treaty
30 Yearling Heifers**

Meet Molly Cooksey

Meet Molly Cooksey of Roggen, Colorado and her 2017 Colorado State Fair Champion Senior Angus heifer calf, AD Miss Tina 2616! This heifer is out of Ms Pass Creek 560 981 2120 and sired by Pass Creek 560 0212 2092. Molly and her family have been long time supporters of our PCAR genetics and have raised many Pass Creek Angus female that have become Colorado Fair Champions.

We visited with Molly to ask her about herself, her family and why she chose Pass Creek Angus Ranch for her foundation cattle. Molly explained, “We learned about Pass Creek Angus Ranch through a cattle buyer named Bob Brackin who is a good friend of our family. We chose Pass Creek Angus Ranch females for their optimally size in our operation and feed conditions. They have great maternal characteristics and continue to be great producing cows in my herd.”

“One of my most successful Angus females I purchased from Pass Creek Angus Ranch was Ms Pass Creek 409 2044 883 (Rosie) who was the Reserve Champion Angus female at the Colorado State Fair in 2009 and placed 3rd in her class at the 2010 National Junior Angus Show. Another PCAR heifer I did really well with was Ms Pass Creek 878 2145 0208 (Chloe). She was the Champion Angus female at the 2012 Colorado State Fair and the Grand Champion Heifer at the 2012 Boulder County Fair.”

We asked Molly if she had sold any of her champion females or is she growing a herd of her own. Molly said, “We have kept all of my PCAR females as they have grown into good cows and have helped me build my base, which are part of my herd that helped me to win the Colorado FFA Beef Production Proficiency Award in 2016 and my American FFA

Meet Molly Cooksey

degree in 2017.” “You can see on the registration paper for AD Miss Tina 2616, the heifer is owned by Anders Dennison. Anders is my 1 year old cousin. My family has roots in the Angus industry and I wanted to grow those roots to the next generation, so I decided to give Anders a heifer out of my cow to start his own herd. With him being an American Angus Association member, my family is now four generations into the Angus industry. I am very passionate about the Angus breed, and I wanted him to get into the cattle industry and more importantly the Angus industry at a young age because it is important to our family. When I was little, my family gave me a heifer, so I wanted to do the same for him. It was also neat to be able to say that he was a part of the American Angus Association at 2 weeks of age.”

We asked Molly what her plans for the future are. She said “I will earn my Associates degree from Northeastern Junior College in Sterling, Colorado in December 2017 and will transfer to Colorado State University and continue my major in animal science with possible plans of adding additional majors or directions in the area of meat and food science. I’m not completely sure what my future will look like but I believe it will be shaped by my interests in cooking, working with and managing my cattle, combining the two to promote beef as part of a healthy life choice; personal training, and encouraging and empowering girls and other individuals for them to know that they are beautiful, and following in the direction that God takes me.”

We, of Pass Creek Angus Ranch, are proud of Molly Cooksey and all her accomplishments. She will continue, with pride, to be part of the Angus industry and will certainly excel in any endeavor she chooses. Thank you, Molly, for choosing Pass Creek Angus Ranch as your foundation females!

Bull Report EPD Data

Expected Progeny Difference (EPD) is the prediction of how progeny of each animal are expected to perform relative to the progeny of other animals in the Angus breed. As data continues to accumulate, accuracy levels rise and EPDs can shift accordingly.

Calving Ease Direct (CED) is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW) expressed in pounds, is a predictor of transmitting ability for birth weight. The Angus breed is noted for calving-ease. A bull with a Birth Weight EPD under +2.6 is generally regarded as suitable for mating with virgin heifers.

Weaning Weight EPD (WW) expressed in pounds, is a predictor of the transmitting ability for weaning weight. An emphasized trait when marketing calves at weaning. For example, you can expect progeny from a sire with a +60 weaning EPD to weigh 30 lbs. more at weaning on the average than progeny from a sire with a weaning EPD of +30.

Maternal Milk EPD (Milk) is a predictor of transmitting ability of the portion of calf weaning weight attributed to daughters' milk. An indicator of replacement female production level.

Yearling Weight EPD (YW) expressed in pounds, is a predictor of transmitting ability for yearling weight. An emphasized trait for yearling feedlot performance and profitability.

Marbling EPD (Marb) is a predictor of transmitting ability for intramuscular fat. The majority of straight Angus cattle grade USDA Choice or higher under normal feedlot management.

Ribeye Area EPD (Ribeye) is a predictor of transmitting ability for ribeye area. Muscle is a key component of yield grade.

Beef Value (\$B) facilitates what almost every beef breeder is already seeking - simultaneous multi-trait genetic selection for feedlot and carcass merit, based on dollars and cents. \$B represents the expected average dollar-per-head difference in the progeny postweaning performance and carcass value compared to progeny of other sires.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. \$F incorporates weaning weight (WW) and yearling weight (YW) EPD along with feed intake data, genomic information and trait interrelationships. Typical feedlot gain value and cost differences are accounted for in the final calculations, along with a standard set of industry values for days on feed, ration costs and cash cattle price.
